GROWTH PROFILE

AI content platforms drown in unstructured sources. I build capture-to-retrieval workflows with metadata schemas, citation chains, and quality gates for knowledge products.

RELEVANT EXPERIENCE

AstroPatshala *Co-Founder and Operations Lead, Remote* Jan 2021–Present

- Built and maintained two production codebases governing customer acquisition, education delivery, research publishing, and internal operations - with deployment cadence tied to licensing releases.
- Structured AstroPatshala research publishing and course licensing as repeatable GTM assets - pricing tiers, channel partners, and delivery packaging aligned to the operating model.

Founder and President *Hult AI Collective, London, UK* Jan 2025–Present

- Expanded practical AI learning beyond club events through a guest lecture on agentic workflows and AI-assisted software development for the wider student body.
- Made HAC's work reusable and publicly legible through kartavya.tech/HAC, centralising event records, technical resources, and treasury infrastructure in one operating hub.

RELATED PROJECTS

The Bard - Static Publishing Engine Jan 2026–Dec 2026

- Designed an article-first static publishing engine supporting Obsidian Markdown, hand-authored standalone HTML, and Pandoc-generated single-page HTML under one metadata registry with bidirectional wikilinks and backlink resolution.
- Implemented garden-graph visualisation, an atomic Google Drive mirror, and a GitHub Actions deployment pipeline, turning GANET's source material into a reproducible publishing workflow.

Personal Knowledge Management System Jan 2024–Present

- Maintained the working memory for 53 projects across four foundational domains, connecting daily diaries, research, source evidence, decisions, and final deliverables in one professional knowledge system.
- Designed a repeatable capture, store, connect, retrieve, and reuse framework so new work could build on prior learning without losing the context behind a decision.
