ANALYTICAL PROFILE

Decision science fails when assumptions stay hidden. I ship factor, regression, and Monte Carlo diagnostics with explicit method choices that survive peer and committee review.

RELEVANT EXPERIENCE

Siya The Restaurant, SRBS Group Jan 2025–Jan 2026

Menu Engineering Consultant, Jaipur, India

- Built the property restaurant's first digital consumption baseline by OCR-digitising two years of handwritten kitchen registers into SKU-level data for par levels, preparation forecasts, and stock variance checks.
- Redesigned and repriced a 191-item on-property menu through a margin-times-velocity matrix that guided placement, assortment, pruning, and print-ready composition decisions.

Savi Hotels & Resorts Operational Lead, Jaipur, India Jan 2021–Jul 2026

- Increased repeat bookings by 30% within 6 months across 4 hotels by routing structured guest feedback into reception script updates, staffing changes, and amenity fixes reviewed in a weekly ops cadence.
- Automated cash and shift reconciliation with a 14-sheet OpenPyXL workbook, replacing manual cross-checks with an auditable front desk control process.

RELATED PROJECTS

BWC Quantitative Portfolio Audit Engine Jan 2025–May 2025

- Built a reproducible Python 3.13 research stack (uv, PEP 517) implementing Fama-French three-factor OLS, Black-Litterman allocation, and Kelly sizing from explicit assumptions rather than packaged screener defaults.
- Stress-tested the BWC book with 10,000 Monte Carlo paths and Cornish-Fisher VaR (5% VaR -2.56%, Sortino 3.49, Calmar 6.34, Jensen alpha 0.686), keeping simulation firewalled from live execution.

London Airbnb Pricing and Regression Models May 2025–Dec 2025

- Led as primary developer and designer, owning the analytical workflow from data preparation and log-linear model design through interpretation and presentation.
- Estimated a log-linear pricing model on 6,319 London Airbnb listings and 13 variables, explaining 50% of price variance and placing 73% of predictions within one price band.
