RELEVANT EXPERIENCE

Savi Hotels & Resorts *Operational Lead, Jaipur, India* Jan 2021–Jul 2026

- Kept a five-workstation, eleven-drive hotel IT estate live through the turnaround by running cabling, storage health checks, and downtime-window patches so front desk and back office did not drop during peak service.
- Operated guest WiFi across property gateways with per-arrival password rotation instead of shared lobby credentials, then extended network topology when a new router was added so mesh routing stayed coherent for rooms and back office.

Margadarshaka *Co-Founder and Technical Lead, Remote* Jan 2025–Present

- Prototyped a Whisper/C++ edge inference path to hold per-call compute inside the INR 50 ceiling - bounded automation before full voice-stack spend.
- Held real-time voice delivery inside a projected INR 50-per-call ceiling - balancing Whisper inference, response latency, and mandatory human review before any scaled commit.

Founder and President *Hult AI Collective, London, UK* Jan 2025–Present

- Took Hult's student AI organisation from operating concept to public launch by building its programming calendar, outreach cadence, event delivery, treasury controls, and technical infrastructure.
- Made HAC's work reusable and publicly legible through kartavya.tech/HAC, centralising event records, technical resources, and treasury infrastructure in one operating hub.

RELATED PROJECTS

Hospitality and Venture Operations Automation Jan 2021–Present

- Automated staff-attendance reminders and operational mail workflows across hotel properties with logged cron schedules and failure alerts.
- Sketched REST integrations between ERP, POS, and PMS systems to reduce manual re-keying across property operations.

Bloom - Creative Terminal Visualization Jan 2026–Dec 2026

- Architected a physics-driven terminal bonsai simulation in Python and Rich, rendering procedural branch growth, wind perturbation, and falling-petal particles at 60 frames per second in constrained TTY environments.
- Shipped a reproducible uv and PEP 517 environment with a locked dependency graph, Ruff, Pyright, and pre-commit checks, preserving type safety and preventing dependency drift.

EDUCATION

Hult International Business School | London, UK *Expected May 2027*

Triple Crown Business School | Bachelor of Business Administration

~~Double Major~~ | Leadership and Design (Double Major)

~~£7644.00~~ | UK Firsts honors

~~Honors~~ | List for consecutive terms; Academic Excellence Scholarship; Social Impact Award; Full-Ride Master's Grant

~~Building New Generations~~ | Building New Generations Startups; Corporate Entrepreneurship; Design Thinking in Practice; Start-up Challenge; Design Thinking in Web Design
