TECHNICAL PROFILE

Pre-seed SaaS teams need customer feedback in working code fast. I own initial architecture, MVP delivery, and iteration cycles with founders in the room.

RELEVANT EXPERIENCE

- Margarashaka Co-Founder and Technical Lead, Remote Jan 2025–Present
 - Prototyped a Whisper/C++ edge inference path to hold per-call compute inside the INR 50 ceiling - bounded automation before full voice-stack spend.
 - Set stage gates on demand, delivery economics, and human-review cost - testing each before authorising the next build tranche.
- AstroPatshala Co-Founder and Operations Lead, Remote Jan 2021–Present
 - Structured AstroPatshala research publishing and course licensing as repeatable GTM assets - pricing tiers, channel partners, and delivery packaging aligned to the operating model.
 - Built and maintained two production codebases governing customer acquisition, education delivery, research publishing, and internal operations - with deployment cadence tied to licensing releases.
- Independent Healthcare Venture (Client Anonymised) Jun 2024–Aug 2024
Technology and Strategy Consultant Intern, London, UK
 - Translated stakeholder interviews into two decision-ready deliverables: a post-discovery market report and a phased entry plan grounded in customer segments and product thesis.
 - Moved the venture from discovery to launch readiness in two months by shipping three assets: an MVP website, information architecture, and implementation roadmap.

RELATED PROJECTS

- Software Engineering and Systems Projects Jan 2014–Present
 - Shipped production-oriented CRM, ecommerce, revenue-management, and library systems with Flask, Django, and FastAPI, taking each from data model and API design through deployment.
 - Rebuilt algorithmic depth in Dijkstra and heuristic search through implementation exercises focused on choosing the right approach and defending its complexity trade-offs.
- Bloom - Creative Terminal Visualization Jan 2026–Dec 2026
 - Built a deterministic procedural-generation engine for fractal branch topology, parameterising growth angles, bifurcation probability, and bloom density through configurable L-system approximations.
 - Maintained sub-50 ms frame latency across Kitty, Alacritty, iTerm2, and Windows Terminal through frame capping, buffered updates, and dirty-region rendering.

EDUCATION

- Hult International Business School | London, UK Expected May 2027
- Triple Crown Business School | Bachelor of Business Administration
- Double Major in Entrepreneurship and Design (Double Major)
- 3.7/4.00 | UK Firsts honors
- Honors List for consecutive terms; Academic Excellence Scholarship; Social Impact Award; Full-Ride Master's Grant
- Design Thinking in Practice; Future Proofing Challenge; Creativity; Strategic Ambiguity
