GOVERNANCE PROFILE

Regulated teams need risk modelled before audit day. I build control trees and portfolio stress cases, then document gates, owners, and remediation trails that survive scrutiny.

RELEVANT EXPERIENCE

SRBS Group *Associate to the Managing Director, Jaipur, India* Jan 2021–Jul 2026

- Prepared a filing-ready legal addendum under counsel direction so counsel could meet a time-sensitive Indian Supreme Court deadline for a related family matter.
- Verified Indian corporate board resolutions and shareholder records against UK Companies House filings for multi-jurisdiction family-enterprise matters.

Margadarshaka *Co-Founder and Technical Lead, Remote* Jan 2025–Present

- Required human review after every AI-handled call - no unattended counselling sessions and no automated judgment on safeguarding-sensitive calls.
- Set stage gates on demand, delivery economics, and human-review cost - testing each before authorising the next build tranche.

Savi Hotels & Resorts *Operational Lead, Jaipur, India* Jan 2021–Jul 2026

- Triggered a two-month profitability kill gate when leasing velocity and contribution stayed below threshold - returning the property with offboarding records, inventory state, and a reusable pitchbook rather than extending a failed hold thesis.
- Automated cash and shift reconciliation with a 14-sheet OpenPyXL workbook, replacing manual cross-checks with an auditable front desk control process.

Independent Risk Modelling and Control Design Jan 2025–May 2025

- Built hotel FMEA and operational risk registers during the Savi turnaround - mapping service failure modes, kill gates, and control owners.
- Reapplied credit and portfolio-risk methods as independent modelling exercises with documented assumptions, stress trees, and control gates - without claiming regulated advice.

BWC Quantitative Portfolio Audit Engine Jan 2025–May 2025

- Stress-tested the BWC book with 10,000 Monte Carlo paths and Cornish-Fisher VaR (5% VaR -2.56%, Sortino 3.49, Calmar 6.34, Jensen alpha 0.686), keeping simulation firewalled from live execution.
- Built a reproducible Python 3.13 research stack (uv, PEP 517) implementing Fama-French three-factor OLS, Black-Litterman allocation, and Kelly sizing from explicit assumptions rather than packaged screener defaults.

Hult International Business School | London, UK *Expected May 2027*

Triple Crown Business School | Bachelor of Business Administration

~~Double Major~~ *Double Majorship and Design (Double Major)*

~~£764.00~~ | UK Firsts honors

~~Honors~~ | List for consecutive terms; Academic Excellence Scholarship; Social Impact Award; Full-Ride Master's Grant

~~Relevancy Design~~ | Thinking in Practice; Future Proofing Challenge; Social Impact Challenge; Building Next-Generation Startups
